

BEEF MATTERS

AT KALLION FARMS, BEEF MATTERS.

It's why we are in the beef business. We have spent years genetically testing every animal in our program so that we can guarantee they are not only eye-appealing but are also feed efficient and gentle with outstanding marbling and tenderness. The Kallion Farms operation has utilized Igenity and Pfizer/Bovigen DNA profiling for more than five years, selecting to breed only animals with the genetic criteria necessary to fulfill the industries' needs. The consumer wants a high quality, tender product, and the commercial cattleman wants a gentle, feed efficient, high fertility, fast-growing animal that can add that extra profitability to his operation. Kallion Farms Brahms are the perfect animals for the consumer and the profit driven commercial cowman. We stand behind our product 100% because we have the data to support our claims.

KALLION FARMS *In Search of Excellence*
