

FEED EFFICIENCY MATTERS

It is proven that the American Brahman is one of the most feed efficient animals of any breed of cattle. We have found that it takes 5-15 pounds of feed to gain one pound in both male and females. Test have shown that there is a correlation between feed efficiency on a high energy grain ration and on a grass diet. Through the use of our GrowSafe System, we are able to identify the **EFFICIENT** animals and both select and breed to make improvements in our herd and yours.

Kallion Farms Brahmans are:

- GENTLE
- FERTILE
- FEED EFFICIENT
- TENDER
- MARBLED
